

Low-Profile Transmitter Isolation Valve

Maximize tank and vessel availability with a transmitter isolation valve that works!

- Designed specifically for 2", 3" and 4" pad flange level transmitter connections like those on the cook water tank, slurry tank, fermentation tanks, evaporators, etc.
- A compact, light weight, low profile valve design that allows transmitter service without emptying the tank
- Valve design provides true, bubble-tight shut off performance
- **Key feature:** Multi-ported Swirl Purge™ on both the tank side and instrument side of valve accelerates purge water through a torturous path for true cleaning
- Valve meets or exceeds ANSI Specifications and API 607 Fire Rating
- Includes safety lock out handle to assist in maintaining safe handling practice
- Quantities in stock for immediate shipment
