Precision Causticity Control Skid

- Saves money by providing accurate dilution blending.
- Repeatable blending yields best use of chemical with optimized cleaning results.
- Unique filtration approach cleans up "Spent CIP" online while saving wasted Sodium Hydroxide.
- Isolates and concentrates "biologicals" for removal or delivery to Methonator.
- Filter is automated and extremely low maintenance.
- Improves ethanol production efficiency by eliminating potential for bacterial attack.
- Process patent pending.

CAMCO Chemical Company

Greendale, WI • 800-825-0140
bmoffatt@camcochemical.com

Cleaners and Sanitizers

- CIP using less caustic. Reduce caustic usage by 25-50% or more!
- FDA / CVM and Kosher approvals.
- Do you have a foam problem? Reduce and control foam levels without additional defoamers.
- Reduce cleaning and rinsing time, and water usage!
- Maximize cleaning efficiency.
- Potentially reduce the need and use of costly antibiotics!
- Safe. Non-hazardous material.
- Flexible shipping and packaging options.
- Guaranteed results with review!

Loadout Systems - Liquid

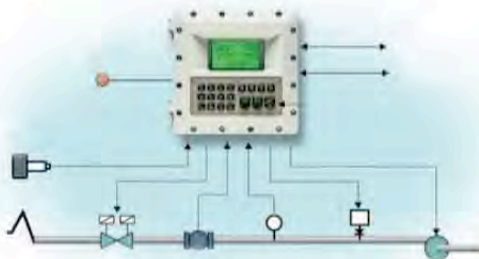

BioFuels Automation

Plymouth, MN • 888-870-3835
www.biofuelsautomation.com

Optimized Load-Out System

- Error reduction saves up to 150,000 GPY.
- Totally computerized, automated for improved accuracy and reliable control of ethanol loading.
- Exceeds custody transfer standards.
- Minimize recalibration frequency.
- Self-contained, unitized construction.
- Hydrostatically and hydrodynamically tested.
- Custom fabricated by system specialists to withstand the test of time.
- Automated precision blending.
- Automated software-based invoicing and inventory management.
